About Me

I've built a restaurant leadership career on teamwork, logistics, problem-solving, and delivering exceptional experiences under pressure. I now craft responsive, user-friendly, and visually appealing websites and applications with JavaScript, Bootstrap, and React. I'm an enthusiastic, self-motivated learner, but will benefit from objectives, standards and mentorship that come from working on a team.

Tools I'm Learning to Use & Tools I'm Using to Learn

SheCodes Bootcamp: structured learning that covered html, css, bootstrap, JavaScript, VSCode, API, NPM, GitHub, Hosting, AI, Python, Data Structures, React.js.

freeCodeCamp: I'm currently working through the core curriculum to reinforce and expand on the basics.
